OK CANCEL

You can follow the steps below to add a new city location.

Step 1: Go to **Windows Start > All Programs > DSM8 > Setup DSM8** to stop all services.

Step 2: Visit <https://www.yahoo.com/news/weather> and change the location to your city.

Copy the city code shown at the end of the URL address.

Step 3: Visit DSM8 server **D:\ProgramFiles\DSM8\apache-tomcat\webapps\ROOT\WEB-INF\classes**, find and open **globalcity.xml** with WordPad. Add your city and its code (woeid) into the file. Save the file when completed.

Step 4: Go back to **Setup DSM8** and restart all services.

Step 5: Login <http://DSM8 server address:8001/admin> and navigate to **Weather**. Click **New** to add the city into the city list.

Step 6: Go to the last page to find the city. Select it and click **Edit**. Click **UPDATE**.

Step 7: Login <http://DSM8 server address:8001> and navigate to **Player**. Select a player and click **Edit**. The new city has been added into the Location dropdown list.
