

Method One: Publish campaigns online

Navigate to **Player**. Select your player and click **Campaign** at the bottom.

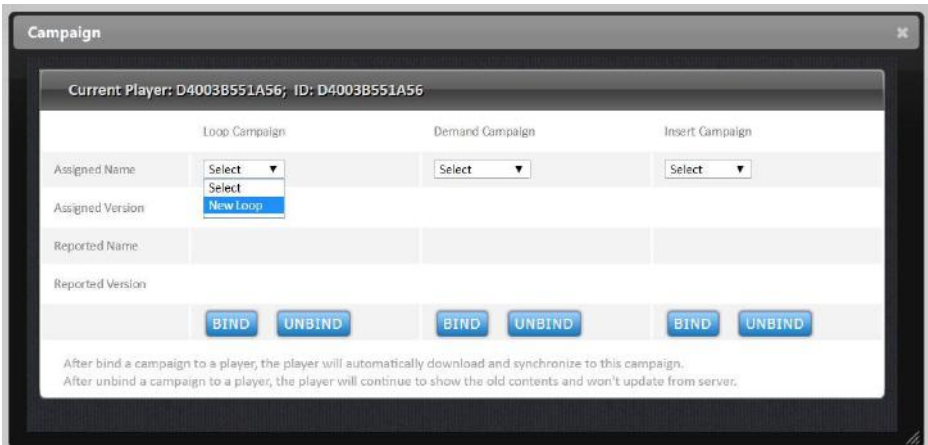

The screenshot shows the 'Player Group' management interface. The 'Player' tab is selected. The table below shows the details of a player:

Player ID	Player Name	Recent Online	Download Status	Campaign	City	Online	Log
<input checked="" type="checkbox"/> D4003B551A56	D4003B551A56	Never	Finished	==	New York	●	View

At the bottom of the interface, there are buttons for 'New', 'Edit', 'Del', and 'Campaign'.

Select a campaign in the dropdown list and click **BIND**. Close the window.

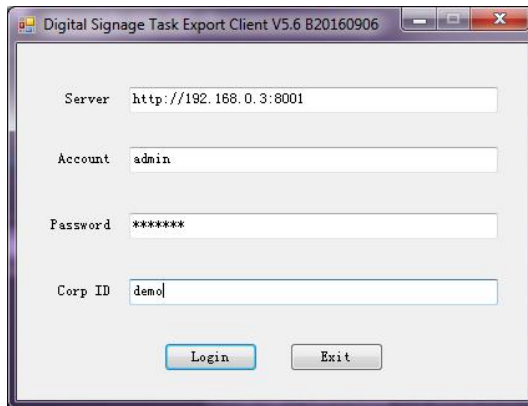

The screenshot shows the 'Campaign' dialog box. The current player is identified as 'Current Player: D4003B551A56, ID: D4003B551A56'. The dialog has three columns for different campaign types: Loop Campaign, Demand Campaign, and Insert Campaign. Each column has an 'Assigned Name' dropdown menu. The 'Assigned Name' dropdown for the Loop Campaign is open, showing 'New Loop' as an option. Below the dropdowns are 'Reported Name' and 'Reported Version' fields. At the bottom, there are 'BIND' and 'UNBIND' buttons for each campaign type.

After bind a campaign to a player, the player will automatically download and synchronize to this campaign.
 After unbind a campaign to a player, the player will continue to show the old contents and won't update from server.

Method Two: Publish campaigns through devices

Use a USB flash drive

1. Run **DSEExportClient.exe**, and login in the same way as DSM8.

Digital Signage Task Export Client V5.6 B20160906

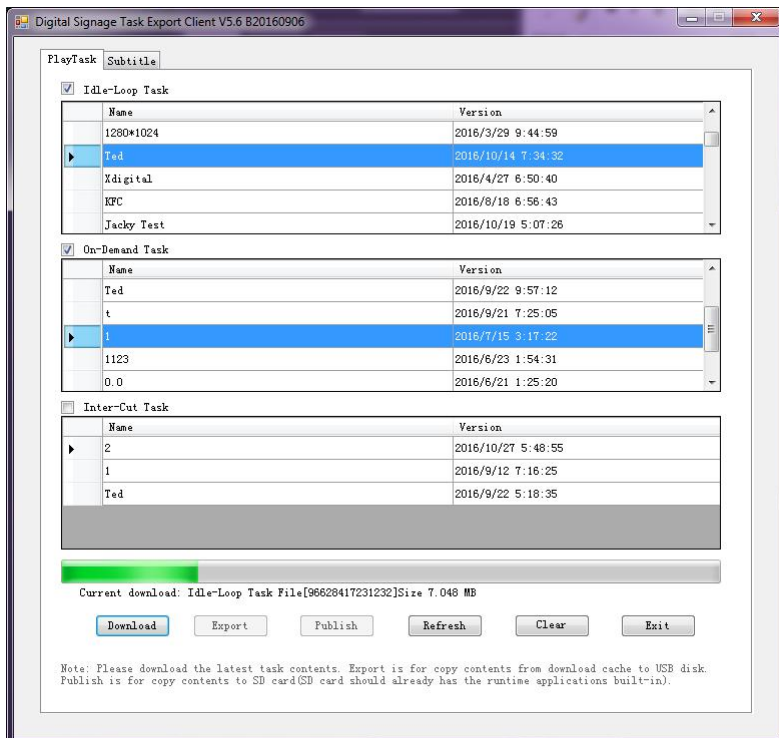

Server:

Account:

Password:

Corp ID:

2. Select the campaign and click **Download**.

Digital Signage Task Export Client V5.6 B20160906

PlayTask: Idle-Loop Task

Name	Version
1280*1024	2016/3/29 9:44:59
Ted	2016/10/14 1:34:32
